EFFICACY *in* EVERYTHING

Efficacy is the power to produce a desired result.

- Formulations that work.
- Quality beyond what's expected.
- Manufacturing to a higher standard.
- Service you can count on.

For more than 35 years, Ortho Molecular Products has partnered exclusively with health care providers to deliver nutritional solutions of the highest efficacy. The most trusted voices in health care put their trust in our products to help patients get better, faster.

Our commitment to science, careful raw ingredient selection, and strict quality standards goes into every supplement we formulate. All products purchased through health care providers come with efficacy guaranteed.

EFFICACY *in* FORMULATION

Evidence-based formulas and superior raw materials are in optimal potencies, so patients get better, faster.

FORMULATIONS THAT WORK

Evidence-Based

Evidence-based lifestyle and nutritional therapies will transform the practice of medicine, and we are dedicated to creating innovative clinical models and nutritional solutions to that end. The evidence supporting the use of nutraceutical ingredients is multifaceted. Whether it is years of traditional use, observations in clinical settings, genomic and epigenetic studies, or well-controlled human clinical trials, our research team has the expertise to assess a wide range of data, allowing us to choose ingredients with precision.

Raw Material Superiority

Knowing the source, extraction methods, and manufacturing processes of each ingredient is the first step in producing efficacious products. We have a long history in this industry, and have cultivated relationships

with reputable raw material vendors. The raw materials chosen for our products are selected to match what is proven effective in clinical trials. Our products are guaranteed by the trust built with our vendors. Simply stated, we do not use inferior raw materials. Ever.

Therapeutic Potency

Even if a formula includes evidence-based ingredients in a superior form, it will not work if the dosages are inadequate. We always include the precise therapeutic potency of each ingredient, based on established research. Each formula includes only the therapeutic amount of ingredients and no additives, allowing for fewer capsules per serving and enhanced patient compliance. We are committed to formulation efficacy and the practitioner-patient relationship, which ultimately helps your patients achieve their best health possible.

EFFICACY *in* QUALITY

We rigorously test in our state-of-the-art, in-house laboratory to ensure purity, strength and composition.

QUALITY BEYOND WHAT'S EXPECTED

Even in the professional supplement channel, a variance in quality persists. We place the highest level of value, both monetarily and ethically, on producing efficacious products for the health care practitioners we serve.

Quality is intrinsic to our products not through word alone but through established, repeatable processes and systems. These include the following:

- We follow rigid SOPs (standard operating procedures) and MOPs (methods of procedure) throughout every stage of production, making our products not just efficacious, but consistently so.
- All raw materials are core tested upon receipt, meaning multiple samples are taken from all levels of the container, not just skimmed from the top. This process ensures that suppliers are not

parsimonious with raw materials and that raw materials are not adulterated in any way. Through sample analysis, raw materials are examined for identity, microbiology and purity.

- We mix all of our raw materials in dedicated blending rooms using a gravity-fed powder distribution system, following strict protocols to ensure product consistency.
- After formulation, our thorough, verified cleaning process requires equipment to be shut down, dismantled and cleaned using an automated washer to protect against cross-contamination.
- We subject every new formula to stability testing, which involves assaying ingredients to detect any degradation, thus ensuring the formula meets label claim at expiration.

EFFICACY *in* MANUFACTURING

We manufacture our own formulas and control every step of the process—a rarity in today's industry.

MANUFACTURING TO A HIGHER STANDARD

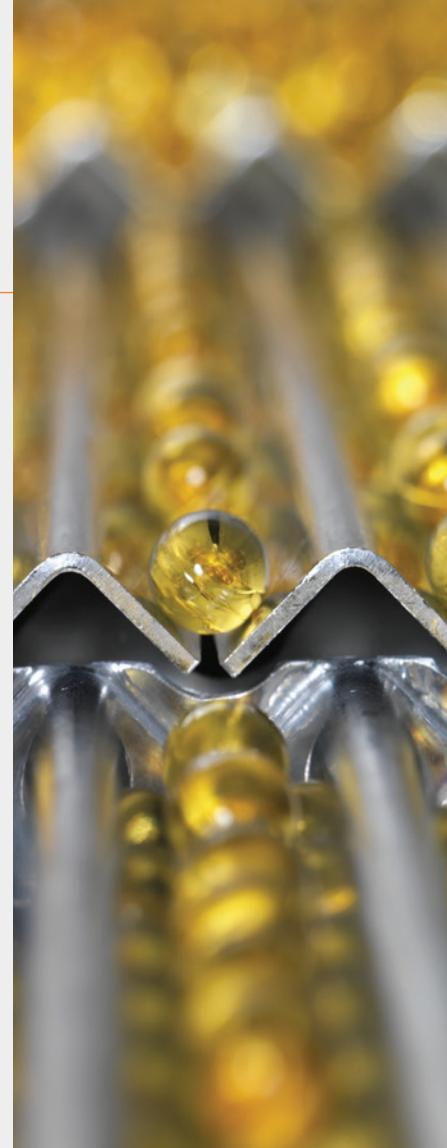

We maintain a legacy of good manufacturing practices, instated long before cGMPs became compliance requirements. We stay up-to-date on industry research and testing methods, and fine-tune our manufacturing practices accordingly.

We own and operate a cGMP, FDA-audited manufacturing and distribution facility in Stevens Point, Wisconsin. The facility is equipped with high-performance HVAC and desiccant control that maintains ideal manufacturing conditions. Our staff are highly trained personnel who share a passion for efficacy.

Because we control the entire production process—from formulation, raw material sourcing, and manufacturing, to laboratory testing of incoming materials and finished products, to bottling and labeling—we are free to be perfectionists.

Our manufacturing facility is strictly controlled by rigorous standards that meet cGMPs, and it routinely passes FDA and third-party audits. Extensive testing on every lot we manufacture means you can trust the consistent purity, strength, identity and composition of each and every Ortho Molecular Products formula.

It's rare for a supplement company to handle all phases of production. But when your standards are as high as ours, you don't want to entrust it to anyone else.

EFFICACY *in* SERVICE

We pride ourselves on excellent service, speedy order shipment and educated technical support.

SERVICE YOU CAN COUNT ON

If formulation efficacy is the foundation, then service to our customers is the structure that supports our company mission. Our Sales team undergoes extensive, hands-on training to prepare every Account Executive for high-level conversations with health care practitioners. Even after training is complete, Account Executives are mentored by experienced colleagues to understand the unique challenges clinicians face and work together to give you the support needed for you to succeed.

This collaborative mentality extends to our partnership with you. Our products deliver consistent results and are delivered on-time to your practice; in fact, all orders received before 3 p.m. ship the same day.

Our West Coast Distribution Center has expanded our distribution network and allowed us to provide even faster shipping and better service to our customers.

We recognize the negative impact of backorders and delayed shipments on your business—it is disruptive and costly. We not only maintain the inventory to sustain your business but also the support team needed to respond to questions or concerns in a timely manner.

OUR 35-YEAR COMMITMENT TO EFFICACY

True to our promise since day one.

1989

Ortho Molecular Products is founded with a deep commitment to honoring the practitioner-patient relationship and manufacturing dietary supplements with unsurpassed efficacy.

1993

Natural D-Hist®, the most effective natural product for seasonal support, becomes a breakout product.

1998

OMP opens state-of-the-art, cGMP manufacturing facility in Stevens Point, Wisconsin to support rapid growth.

2000

OMP introduces Orthomega®, the first burp-free, high-concentration fish oil for improved results with fewer soft gels.

2003

A 60,000-square-foot manufacturing expansion is completed to prepare for long-term growth.

2006

Lab expansion provides critical growth for research and testing capabilities.

2010

OMP opens corporate office in Woodstock, Illinois and expands Customer Service team to better serve customers.

2024

OMP celebrates 35 years of exclusive partnership with health care practitioners.

2012

OMP expands again, increasing manufacturing capacity and fulfillment with 88,000-square-foot facility.

88k ft²

2016

OMP expands international presence in Canada.

OMP announces redesigned product labels, featuring a modern, distinctive look and a unique category-driven system.

2017

OMP opens second corporate office in Lake Barrington, Illinois.

OMP forms exclusive partnerships with HP Ingredients to provide Bergamonte® in Bergamot BPF and Nattopharma to provide MenaQ7® PRO in all vitamin K products.

2018

OMP opens West Coast Distribution Center and expands distribution network, providing faster shipping and better service to customers.

OMP forms exclusive partnership with Entera Health to provide dairy-free serum-derived bovine immunoglobulins in SBI Protect®.

2019

OMP completes expansion of manufacturing facility, nearly doubling square footage.

2X

2020

OMP launches Turiva®, a full-spectrum turmeric supplement, which contains an exclusive blend of bioactive phytonutrients that make up the Complete Turmeric Matrix for increased clinical efficacy.

2023

OMP launches OrthoPacks®, a convenient, new way to deliver personalized nutrition.

OrthoPacks®

EFFICACY *is* **EVERYTHING**

*e*FFICACY

the power of *e*[®]

Simply put, the power of *e* is our commitment to formulation and raw ingredient efficacy that produces the highest possible levels of patient wellness. For more than 35 years, Ortho Molecular Products has successfully combined evidence-based formulations and superior raw ingredients to develop nutritional supplements that noticeably enhance patient health.
